

airtouch⁴

**IFTTT Integration
Quick Start Guide**

IFTTT

do more
with AirTouch

Enhance Your Air Conditioning

Yield the power of controlling the temperature and home climate from just about anywhere, anytime of the day; and now with IFTTT and AirTouch, you can create your own Applets to do just about anything with your air conditioner.

www.ifttt.com/airtouch

1

1 Install the IFTTT App from your PlayStore or iTunes account to your iOS or Android device.

2

2 Locate the App, scroll to the left, choose to sign in with Google or Facebook and Get Started with IFTTT.

3

3 Search for AirTouch on the Discover page. It will appear on your Applets tab and the Services tab.

4 / 5

IFTTT with airtouch⁴

- 4 Connect to AirTouch and pick an account to associate it with.
- 5 Key in your AirTouch Device ID and Password. Tap **NEXT**.

6 / 7

6 You'll be prompted to Grant Permission to IFTTT. Tap **Allow**.

7 You can now use the **Trigger/Action** provided or create your own Applets.

- 8 Example of Applet chosen: **Turn off the Air Conditioning when I leave an area**. Follow prompts.
